

## **Leadership assignment:**

### **Boda-boda section**

The boda-boda guy is required to register the following:

- Name of the driver
- Number plate
- Colour of motorbike
- Time of arrival
- Model of motorbike
- Date of arrival
- NIN number
- Phone number of the driver

The following are the charging prices:

- 2000 ugx for day-parking
- 2000 ugx for night-parking
- 1000 ugx for parking less than an hour

On parking each motorbike is issued with a receipt and with a unique number that will be used to confirm during the signing out of the motorbike.

## **Instructions:**

Come up with a software solution for easy management and record keeping to fill the gap for Parkville.

## **What to do and rules that will govern the Boda-boda parking section at Parkville (Solution).**

1. First, we shall design an inventory system for Parkville to help in recordkeeping and management of the fleet.
2. Digital timestamp cards will be put in place to help the customers in lining up for Parkville services.
3. Customers will be required to undergo full body security checks before accessing Parkville services.
4. Parkville staff will be required to use biometric finger print scanners on customers for proof of identity.
5. Parkville will be required to use security cameras to monitor movements and standby guards to alert suspicious activity within the premises.

6. Parkville staff should report early for work and attend to customers appropriately.
7. Access to some premises should be restricted to staff only.
8. The staff are not allowed to handle physical cash from the Boda-boda customers therefore money should be banked and handle bank slips only.
